Declaration

Shore power installation for (inland) vessels

The reduced tariff applies to electricity supplied to shore power installation for (inland) vessels that has its own independent connection. The supply of electricity to (inland) vessels is taxed at the rate set out in Article 60b, paragraph 1 of the Environmental Taxes Act.

Application of the reduced tariff

The consumer declares that he/she obtains electricity via the specified connection(s) from the named supplier and uses it in the manner described in Article 60b, paragraph 1 of the Environmental Taxes Act. On this basis, and under the Implementation Decree on Environmental Taxes, the consumer requests the supplier to apply the reduced energy tax tariff for electricity supplied to a shore power installation. The consumer further declares:

1. That the electricity is used exclusively in a shore power installation for (inland) vessels, excluding private pleasure craft as defined in Article 70a, paragraph 3, with an independent connection, and that this shore power installation does not form part of a larger immovable property as defined in Article 16, sections a through e of the Valuation of Immovable Property Act (WOZ).

2. That the consumer is not in financial difficulty as defined in Article 21c of the Implementation Decree on Environmental Taxes.

3. That the administration is organized in such a way that all business transactions relevant to this exemption are clearly recorded.

4. That any changes in circumstances affecting the application of the exemption from energy tax will be reported to the supplier immediately, and at the latest within six weeks.

Explanation of this declaration

This declaration is valid indefinitely, or until the consumer informs the supplier in writing that the situation has changed. If the consumer submits an incorrect declaration or fails to withdraw the declaration when circumstances change that affect energy tax liability, the supplier cannot be held responsible for the consequences. If inspections by the Tax Authority or otherwise reveal that, based on this declaration, the supplier has failed to remit energy tax, the Tax Authority may directly levy the unpaid energy tax from the consumer.

If the Tax Authority levies the supplier instead, the supplier or its legal successor will charge the unpaid tax, including any fines and/or damages incurred, to the consumer. The consumer declares to pay this total amount directly to the supplier. It is therefore essential that any changes affecting tax liability (e.g. no longer meeting the conditions for resupply exemption) are immediately reported to the supplier.

Effective date of the declaration

The requested application of the reduced tariff can only take effect from the month in which the declaration is signed and dated.

Consumer / declarant information

Company name	
Address	
Postal code and city	
Account number	

For the following connections, there is an independently metered shore power installation for (inland) vessels:

Connection details

Effective date	EAN code	Address	Postal code and city

If more than three connections, please provide them in a separate (Excel)list.
