

Change request

Residential function of connections

Explanation

If you have a connection with a residential function, you are entitled to a reduction in energy tax. This is a fixed amount per connection that is deducted from the energy tax you owe.

The reduction is applied by your energy supplier. With this form, you can notify Eneco Zakelijk of changes in the function of your connections.

[Check whether your address qualifies as a location with or without a residential function \(PDF\).](#)

Details of the change

EAN-code connection

Please tick the applicable option.

Your account number

(you can find your customer number on your Eneco invoice)
