Declaration

regarding the supply of natural gas For a Combined Heat and Power Installation (CHP/WKK)

Consumer / declarant information

Company name	
Address	
Postal code and city	
Account number	

Supply address information

EAN code Gas	
EAN code Electricity	
This declaration applies to calendar year	

Gas consumption

Is the supplied gas used exclusively in the CHP installation?

- ☐ Yes: In this case, all gas consumption is classified as CHP consumption. The consumer must report the gross electricity production of the CHP installation and the related feed in to the grid monthly by email to: CA_Facturatie@eneco.com[1]
- ☐ No: In this case, the consumer must report monthly the CHP consumption, the gross electricity production of the CHP installation, and the related feed in to the grid by email to: CA_Facturatie@eneco.com[2]
- ☐ I declare that the electrical capacity of the installation is **less** than 20 megawatts
- ☐ I declare that the electrical capacity of the installation is **more** than 20 megawatts.

If the consumer supplies electricity from the CHP installation to another supplier, the consumer must also report monthly the amount of electricity fed back into the grid by email to: CA_Facturatie@eneco.com.

The consumer declares that at the above-mentioned consumption location, natural gas is purchased from Eneco Zakelijk B.V., located at Marten Meesweg 5, 3068 AV Rotterdam, intended for a combined heat and power installation (CHP/WKK). The natural gas consumed in the CHP installation is measured separately.

The consumer further declares that any changes in circumstances affecting the application of statutory regulations will be reported immediately to the gas supplier.

This declaration is valid for _____ and thereafter an indefinite period, from the date of receipt by Eneco Zakelijk, until revoked.

Enter the relevant year above.
